

This is a [Next.js](#) project bootstrapped with [create-next-app](#).

Deployed Website URL

<https://tv-maze-sooty.vercel.app/>

## Getting Started

First, run the development server:

```
npm run dev
# or
yarn dev
```

Open <http://localhost:3000> with your browser to see the result.

You can start editing the page by modifying [pages/index.js](#). The page auto-updates as you edit the file.

[API routes](#) can be accessed on <http://localhost:3000/api/hello>. This endpoint can be edited in [pages/api/hello.js](#).

The [pages/api](#) directory is mapped to [/api/\\*](#). Files in this directory are treated as [API routes](#) instead of React pages.

## Run from Docker

---

For run this project from docker follow these commands:

First we enter to [tv-maze-docker](#) directory

```
cd tv-maze-docker
```

The next step to just run docker container by this command

```
docker compose up
```

## Learn More

To learn more about Next.js, take a look at the following resources:

- [Next.js Documentation](#) - learn about Next.js features and API.
- [Learn Next.js](#) - an interactive Next.js tutorial.

You can check out [the Next.js GitHub repository](#) - your feedback and contributions are welcome!

## Deploy on Vercel

The easiest way to deploy your Next.js app is to use the [Vercel Platform](#) from the creators of Next.js.

Check out our [Next.js deployment documentation](#) for more details.
